(And responding to feedback from Henderson)

Hello

Excellent response.

I would suggest that:

1.CPD: AIR does not have to be the only CPD manager. It seems to me feasible for PRP to be a CPD manager for radiation health workers.

2.Insurance: Techs will have to show they are covered by relevant insurance. They will mean a standard letter from PRP insurer. They will not require any other insurance unless they undertake other work for example moonlighting at the 24 hour clinic , working as a contractor (not an employee) etc.
