Medical Radiation Practice Board of Australia

Continuing Professional Development (CPD) Registration Standard

Requirements

(a) This is quite onerous for a rural practitioner as travel time is not included. The current AIR standard of 36 hours over 3 years would be sufficient

(b) Does this include eg sonography? This should be included in the base hours

As a rural MIT travel to CPD events can add up to 2 days extra travel and/or cost. Could this be taken into account?

Is there any comment that the current PII from the AIR is sufficient from the requirements of the proposal?

Thank You

Regards

S. Nelson
