To whom it may concern;

I am a part-time Radiographer currently working for NSW Justice Health - I would like to ask for you to consider two aspects of whatever CPD scheme gets up and running.

1. Firstly I understand from your website that there will be no discount to the registration fees for part time Radiographers - but will there be any consideration given to have less CPD points required for part time staff? There are a number of part time staff such as myself that fill the gaps of many hospitals and private practices around the country that might not be able to complete all of the required study. I fear that a rigid one size fits all approach may make it harder for many experienced radiographers. Could there be some consideration for part time staff in the CPD requirements? Even if it were a flat rate of half for anyone one working less than 20 hours a week.

2. Could there be some way to complete the CPD points online - there are many radiographers who have time at work when it is quieter that could be used to read journal articles etc instead of using time outside of work hours. I think that an online method of study would not only make it easier to complete by the practitioners but also monitor by the board.

Will there be a cost associated to an outside party such as the AIR or will this cost be part of our registration fees and be administered through the Board ? I would prefer the later.

Thankyou for your consideration

J. Noonan
